The SLV Halle GmbH is a member of „Zuse-Gemeinschaft“

Free search

(free of charge)

This position contains a simplified convenience search. A search according to geographic criteria is not possible. The company name and certificate are displayed in the search results. No contact or address information is displayed, unless the company displayed uses company advertising.

Light version

You receive access to the complete catalogue of the online register for rail vehicles. This catalogue comprises a daily updated PDF file with all companies contained in the register, organised according to country and place. For each company the catalogue includes certification EN 15085-2, information regarding class, validity, materials groups, welding processes and the company address.

Full version

The Full version includes the Light version. In addition, you can also make targeted searches for specific certification EN 15085-2. These search criteria are divided into technological and geographical criteria. Technological criteria include the materials group, the class and the welding process. Geographical criteria include the country, the place or recognised office. This provides you with a filtered list of certifications satisfying your criteria. The accompanying certification may also be inspected. Should the company concerned have selected company advertising, a company profile and contact information is also displayed.

PRICES AND PAYMENT METHODS

**Company advertisement**

Here you have the opportunity to present yourself more effectively within the online register. You can enter an own company profile and add contact information. A company advertising will be colour highlighted in the search results and ALWAYS displayed before a company that does not advertise. All information are also visible in free access.

Orders can be placed online at www.en15085.net
